Internship (1.5 Months)		
Phoenix Global (Afors consulting), Hyderabad		Web Development Engineer May'24-June'24
Description	I worked on a project "EV-HUB" focused on creating a slot booking system for charging electric vehicles (EVs). The system allows users to select the date, time, and location for charging their EVs and book the slot accordingly. This project was developed using JavaScript, HTML, and CSS to ensure a seamless and user-friendly experience. My contributions included designing the user interface and responsive landing pages for the website.	

Projects & Research Papers	
1. Slot-booking system	
<ul style="list-style-type: none">Description:Designed a slot-booking system basing on a travel agency in which you can browse and book travel packages including features like package details, booking form and customer reviewsThe project was designed using Scripting languages.	
2. Configuring network segmentation to isolate IoT devices and reduce the risk of a network breach	
<ul style="list-style-type: none">Description:Configuring network segmentation for IoT devices is essential for enhancing security. It isolates these devices into separate Virtual Local Area Networks (VLANs) or subnets, minimizing their interaction with other network components Proper configuration, including VLANs, access control, and monitoring, also boosts performance and simplifies management.	
Positions of Responsibility	
<ul style="list-style-type: none">Member of Gitam Quiz Club, VisakhapatnamLeader of club in School	
Extra-Curricular Activities	
<ul style="list-style-type: none">Actively participated in the Edu Youth Meet (2024) held at Gitam University, VisakhapatnamWorked as volunteer in shore fest in GITAMIncorporated in the events conducted by the Gitam Quiz Club, Visakhapatnam	
Hobbies	
<ul style="list-style-type: none">Playing games like cricketExploring new places
